

## Information

We have pleasure in introducing our new product range – Polyron Quick Couplings.

Connect Poly to Steel quickly and easily.

The New POLYRON System allows Polythene Pipe to be connected directly to B-Type Quick Connecting Ball Couplings, Victaulic Couplings and Threaded Connectors. From now on the flexibility of quick ball fittings for your applications means labour saving in more applications. State of the art B-Type Quick Couplings come fitted to the polyron to ensure the reliability and performance you have come to expect.

This new POLYRON System will be directly welded to SDR26, 17 or 11 Polythene Pipe PE100 in sizes from 2” to 12”. Available in glavanised steel and stainless steel.

The POLYRON system guarantees a high resistance to corrosion and a range of chemicals, and to a wide range of temperatures due to climatic variations.

The POLYRON can be fitted to most applications like irrigation, road construction, mining, air lines, civil projects, chemical and food industries.
